Jefferson Labs - http://education.jlab.org/solquiz/index.html

At this site, you should check the box for 20 questions and the Geometry box. This site has over 400 questions, so each time you do a set of 20 questions, you will get new questions, though you might get one or two that are the same. If it does keep repeating the same 20 questions, you need to see me and I will show you how to fix the problem.

Make sure that when you sign it, you use your first and last name. You can do this site up to **three** times a day. The most points you can earn is 20 points. You must score 70% or higher on any of the tests in order to earn points. You will be given whatever percent you earned on the test multiplied by 2. For example, if you scored 80% on one of the tests, you will get $.8 \times 2 = 1.6$ bonus points.

When you finish a test, you must email it to <u>mathintheusa@gmail.com</u> and you must record the required information on the sheet below, which will be due on or before May 4.

Date	Total Time spent on test	Difficulty 1-10 1-easy 10-very difficult	Percent Correct
