

My college professor gave me a problem like this 30 years ago, so this is not mine.

There are twelve friends who have been chatting on the phone:

Aaron, Beth, Chad, Dina, Eddie, Fred, Gillie, Hannah, Ira, Juan, Kevin, and Leon.

Below is a map of their twelve houses. A line connecting two houses shows which two people talked on the phone. Use the map and the clues to figure out in which house each person lives. Fill in the blanks with the person's **first initial** when you have figured out where he or she lives.

Here is the list of who talked to whom last night:

Gillie – Ira	Beth – Juan	Dina – Eddie	Dina – Gillie
Aaron – Juan	Hannah – Eddie	Dina – Ira	Chad – Dina
Beth – Kevin	Eddie – Fred	Hannah – Aaron	Chad – Juan
Aaron – Eddie	Beth – Chad	Juan – Eddie	Leon – Kevin
