

Use the digits 1-9 in numerical order to make the statement true.

Example: Use digits 1-4 in order to make 19.

$$\boxed{12} + \boxed{3} + \boxed{4} = 19$$

Notice how the digits are in order from 1 to 4 (1,2,3,4).

$$\boxed{} + \boxed{} - \boxed{} + \boxed{} - \boxed{} = 100$$

Digits must be in order from 1 to 9.
